

Secondary Transition Roadmap for Families

Mile Marker 1

The High School Journey Begins with a Plan: A Transition Plan

This roadmap is designed to give families of students with disabilities, ages 12 to age 22, an overview of the milestones needed to assist their youth to become college, career and life ready. The mission of Florida's Early Learning-20 education system is to increase the proficiency of all students within one seamless, efficient system, by allowing them the opportunity to expand their knowledge and skills through learning opportunities and research valued by students, parents, and communities. The individual educational plan (IEP) is a required document that maps out the support needs of students with disabilities. The IEP also describes the educational journey students take each year to help them reach their goals. As students age, the IEP requirements change. By the age of 14, or to be operational on the first day of high school, an IEP becomes a Transition Individual Educational Plan or TIEP. The TIEP includes both IEP and TIEP components. The TIEP charts the supports and transition services that assist students to be college, career and life ready! See the two tables below for more information.

| IEP Components | |
|---|---|
| Statement of the student's present levels of performance (academic and functional). | Statement of any individual appropriate accommodations (needed to measure the academic achievement and functional performance on state and district-wide assessments). |
| Description of the student's progress toward meeting the annual goals. | Statement of measurable annual goals (academic and functional). |
| Statement of the special education and related services, including supplementary aids. | Explanation of the extent, if any, to which the student will not participate with nondisabled students in the general education class. |
| Projected date for the beginning of services (along with the frequency, location and duration of those services and modifications). | Beginning at age 12, or 7th grade, whichever occurs first, use age-appropriate transition assessments (foundation for measurable postsecondary goals) and identify the student's need for self-determination instruction. |
| Beginning at the age of 12, or 7th grade, whichever occurs first, the student will be invited to the IEP meeting. | Beginning at age 12, or 7th grade, whichever occurs first, the student's need for transition services will begin to be identified. |

| TIEP Components (At age 14 or to be in place and operational on the first day of high school) | |
|--|---|
| Document the graduation pathway decision and whether the student will work toward a diploma designation. | Appropriate measurable postsecondary goals based on the individual child's strengths, preferences and interests. Review annually. |
| Transition services, a coordinated set of activities to assist the student to meet from school to post-school, will be identified and provided. | Develop courses of study that will reasonably enable students to meet their postsecondary goals. |
| Evidence that, if appropriate, a representative of any participating agency was invited to the IEP team meeting with the prior consent of the parent or student who has reached the age of majority (20 U.S.C. 1416(a)(3)(B)). | Document the discussion with the student and family about the deferral process. |
| At least one year prior to the student's 18th birthday, document that the parents have been informed about the upcoming transfer of rights to the student at the age of majority. | At the beginning of the year the student is expected to graduate, the IEP must include a signed statement by the family or the student who has received the transfer of rights that he or she understands the process for deferment and indicates if the student will defer the receipt of his or her standard high school diploma. |

Student Responsibilities

Students are in the driver's seat for the transition process. Starting in middle school, students should do the following:

- Go to class.
- Complete homework.
- Do chores at home.
- Develop and use self-determination and self-advocacy skills (such as

learning more about one's disability and knowing which accommodations are helpful in reaching long-term goals).

- Know your accommodations at school.
- Learn to use and take care of assistive technology (AT).
- Go to your IEP team meetings.
- Take part in developing the IEP (such as sharing your strengths, needs and interests).
- Take and complete career awareness and exploration activities, often called transition assessments.
- Think about the services needed for daily adult life (to help identify the appropriate agencies to be invited to the IEP team meetings).
- Practice expressing your ideas, opinions and needs (self advocacy).
- Practice using self-determination skills (such as making decisions and choices, solving problems, setting goals for yourself and believing in your ability to reach your goals).

Family Responsibilities

Families are important in transition. Students have the best outcomes when families take an active role. Families may help their students by doing the following:

- Ask questions.
- Make suggestions.
- Keep records of transition-related services and activities.
- Review graduation requirements.
- Review and discuss diploma options with your youth.
- Set high expectations for your youth.
- Talk to your child about plans for life after high school.
- Identify strengths and needs to discuss at the IEP meeting.
- Review IEP goals.
- Help your youth practice self-advocacy skills.
- Help your youth practice self-determination skills.
- Help your youth develop a portfolio. Include the following: a copy of the IEP, assessment scores, learning style information, grade-point average (GPA), class rank, honors or awards, work evaluations, work experiences, school accommodations and other related information.
- Provide opportunities to explore post-school options (such as career and technical education programs; apprenticeships or employment opportunities; and colleges and universities).

School and School District Responsibilities

The purpose of exceptional student education (ESE) in Florida is to help every student with a disability progress in school and prepare for life after school. Some of the school and school district responsibilities are as follows:

- Set high expectations.
- Hold IEP team meetings.
- Use age-appropriate transition assessments.
- Help students to take part in their IEP meetings.
- Ensure students have the accommodations and modifications they need to be successful.
- Find strengths, needs and interests of students.
- Include measurable annual goals and postsecondary goals in the IEP.
- Review measurable annual goals. Do the annual goals support students to reach their postsecondary goals?
- Review measurable postsecondary goals. Do the postsecondary goals help students to get the education or training and the jobs they want?
- Teach students self-determination skills.
- Teach self-advocacy skills.
- Connect students with agencies that may help them.
- Provide learning experiences related to employment, such as work-based learning experiences, community-based instruction (CBI) and/or community-based vocational education (CBVE).

Agency Responsibilities

A variety of agencies may play a role in providing services to students. The IEP team should help make connections between the agencies and the student. Agencies can only be contacted or invited to work with the student with parental consent or the consent of a student who has reached the age of majority. Key agencies are as follows:

- Agency for Persons with Disabilities (APD)
- CareerSource Florida
- Centers for Independent Living (CIL)
- Division of Blind Services (DBS)
- Division of Vocational Rehabilitation (VR)
- Leisure and recreation service providers
- Health organizations and providers, including mental health service providers
- Florida Department of Children and Families (DCF)
- Other community-based organizations and providers of services to adults

Pre-Employment Transition Services (Pre-ETS)

Pre-ETS help students with disabilities explore, prepare for and make informed career-based decisions. Students ages 14 through age 21 with an IEP, 504 Plan, or other documented disabilities are eligible to receive Pre-ETS at no cost through Vocational Rehabilitation (VR). Students can be referred online for Pre-ETS by school personnel. There is also a form that can be filled out by another adult in the student's life with permission from the student.

The following list includes all Pre-ETS options available for students:

- Job Exploration Counseling
- Work Readiness Training
- Paid and Un-Paid Work Based Learning Experiences (WBLEs)
- Self-Advocacy Training and Peer Mentoring
- Postsecondary Educational Counseling

Per section 1003.5716, Florida Statutes Pre-ETS should be addressed in the IEP beginning no later than when the student turns 14, or enters high school.

http://www.leg.state.fl.us/statutes/index.cfm?mode=View%20Statutes&SubMenu=1&App_mode=Display_Statute&Search_String=1003.5716&URL=1000-1099/1003/Sections/1003.5716.html

For more information about VR services for students with disabilities, ask your school or please visit the VR website:

<http://www.rehabworks.org/stw.shtml>

Destination Graduation - Florida High School Diploma Pathways

In Florida, students may choose from a number of graduation pathways. Graduation pathways may impact future employment choices, as well as further education and training. Be sure to select the most appropriate graduation pathway for your youth. This should be discussed with the IEP team and may be revisited if needed.

24-Credit Standard Diploma: There are three 24-credit high school diploma pathways. Details are provided in the Graduation Pathways Chart on pages 6 and 7. The majority of students with disabilities will complete the pathway available to all students. There are also two graduation pathways available only to students with disabilities. These two options allow students to substitute a career and technical education (CTE) course with related content for one credit in each of the four core content areas. The second of the pathways for students with disabilities is designed

specifically for students with significant cognitive disabilities who earn credits via access courses and are assessed using an alternate assessment. Learn more information about this at the bottom of this page. *Note - The 24-credit pathways may also be completed as 18-credit options. **Note - Some districts have additional credits requirements for graduation.

18-Credit ACCEL Pathway:

Students in the 18-credit ACCEL pathway must meet all the graduation requirements for a 24-credit standard diploma, except they need to earn only three elective credits instead of eight. Physical education and an online course are not required. As this is an accelerated option, this pathway should be carefully considered.

CTE Graduation Pathway:

Students using this pathway must meet all of the requirements for a minimum of 18 credits in which only four elective credits are required. Two elective credits in CTE courses must result in a program completion and an industry certification. Two elective credits are required in a work-based learning program, or up to two credits of electives, including financial literacy, to fulfill this requirement.

International Baccalaureate (IB) Diploma Program:

The IB Diploma Program is designed for highly motivated students aged 16-19. It is based on a rigorous two-year pre-university course of study with international examinations and university credit. (Check your school district for availability.)

Advanced International Certificate of Education (AICE) Diploma Program:

The AICE Diploma Program is designed for students aged 16-19 who are seeking advanced study in preparation for college or university study. The AICE Diploma Program is based on the Cambridge International Examinations curriculum and assessment. (Check your school district for availability.)

The Performance-Based Exit Pathway:

The Performance-Based Exit pathway is an alternate route to graduation for students who are at least 16 years of age, do not have enough credits for graduation, have a low grade point average (GPA), or are overage for their current grade level. This option is NOT designed to be a preferred or accelerated program for early exit. (Check your school district for availability.)

Standard Diploma Through Access Points:

About 1 percent of all students, which is about 10 percent of all students with a disability, have complex learning challenges that influence their activities, including school, independent functioning, community living, leisure and work. After carefully reviewing student performance, assessment results and other records, IEP teams, which include the parents, may request written consent from parents for their youth to earn a standard diploma via access points. Students on access points are given an alternate assessment, currently the Florida Standards Alternate Assessment (FSAA). The test scores may be waived with the recommendation of the IEP team.

Access points are learning expectations for students with significant cognitive disabilities. Access points are aligned with the general education curriculum and focus on the Florida standards with less complexity. Access points are taught within access courses, but this does not mean that students taking these courses must be in a separate classroom. Access courses can be taught in a general education classroom with the support of an ESE teacher, allowing students to learn in an inclusive setting.

Diploma Designations

To earn a **merit designation** a student must meet the standard diploma requirements and earn one or more industry certifications from the list established per section 1003.492, Florida Statutes. To earn industry certifications, students take CTE courses and must pass a related certification test. To earn a **scholar designation** a student must earn credits in identified courses and pass specified end-of-course (EOC) exams. See the chart below for details or refer to FL Statutes http://leg.state.fl.us/statutes/index.cfm?App_mode=Display_Statute&Search_String=&URL=1000-1099/1003/Sections/1003.4285.html.

| For the Scholar Designation, Students Must Earn | For the Scholar Designation, Students Must Pass |
|---|---|
| 1 Credit - Algebra II | Algebra II End-of-Course Exam (EOC) |
| 1 Credit - Statistics or an Equally Rigorous Mathematics Course | Geometry EOC |
| 1 Credit - Chemistry or Physics | Biology 1 EOC |
| 1 Credit in a Course Equally Rigorous to Chemistry or Physics | U.S. History EOC |
| 2 Credits in the Same World Language | ----- |
| A Minimum of 1 Credit in AP, IB, AICE or a Dual Enrollment Course | ----- |

*Please note: A student with a disability cannot access an assessment waiver if pursuing scholar designation (the EOC assessments referenced above cannot be waived). ** A student is exempt from the Biology I or U.S. History assessment if the student is enrolled in an AP, IB or AICE Biology I or U.S. History course and the student takes the respective AP, IB or AICE assessment and earns the minimum score to earn college credit.

WRONG WAY: Avoid Dropout Danger

Dropping out of high school affects students in many negative ways. Students who drop out of school are less likely to find the kind of jobs they want; less likely to earn as much as a high school graduate; more likely to need public assistance; and more likely to commit a crime. There are many factors that influence students to drop out of high school. Explore this resource for more information on the importance of student engagement - *Pay Attention to Attendance: Keep Your Child On Track in Middle and High School* at https://attendanceworks.org/wp-content/uploads/2017/08/AW_HS-flyer-1-pager.pdf.

Students have the best outcomes when families are take an active role in the education of their youth. Some of the benefits students experience because of active family involvement are as follows:

- Students do better in school and they stay in school longer.
- School culture and environment improve for all involved.
- Students do best when parents are involved in a variety of areas in student learning.
- Student achievement is higher when schools and families work as partners.
- Families, schools and community groups all help to improve student achievement (Henderson & Mapp, 2002).

Changing Lanes: Deferring Receipt of a Standard Diploma

Not only can students with disabilities work toward earning a standard diploma, certain students with disabilities may also defer receiving the diploma and continue to receive educational services through the school district. The deferral process is necessary because students who receive a standard high school diploma are no longer eligible for a free appropriate public education (FAPE). There are two parts to deferral.

1. The student must have an IEP that “prescribes special education, transition planning, transition services, or related services through 21.” This means that, because of the disability, a student must need continued education and services.
2. The student must be enrolled in one of several specific programs. Refer to the chart on this page for programs and their descriptions.

Students with disabilities who earn a standard diploma and do not defer are NOT eligible for any further services from the school district. While in deferment status, students may have flexible scheduling. For example, they may not be going to school every day, or they may have a shorter daily schedule. Student attendance is expected however, students may request their diploma during the deferment time period and exit high school.

| Diploma Deferral through Extended Transition (Florida 18-22 Programs) | |
|--|---|
| <p>Florida Legislation allows students with disabilities to defer receipt of their standard diploma and continue to receive special educational services from their school district [1003.4282(11)(c). F.S.].</p> <p>Deferral timeline for students who defer:</p> <ol style="list-style-type: none"> 1. For the IEP in effect at age 14, or to be in place and operational on the student's first day of high school, a discussion about the deferral process will be documented. 2. For the IEP in effect at the beginning of the school year the student is expected to graduate, there must be a signed statement by the parent, guardian, or the student, if the student has reached the age of majority and rights have transferred to the student, that he/she understands the process for deferment and identifying if the student will defer the receipt of his or her standard high school diploma. 3. By January 30th of the year the student is expected to graduate, school districts will inform families and/or students that failure to defer receipt of the high school diploma once all requirements are met releases the obligation for districts to provide a free appropriate public education (FAPE). 4. May 15th of the year the student is expected to graduate is the deadline for finalizing any changes to the deferral decision (Rule 6A-1.09963, F.A.C.). | |
| <p>To meet the criteria for eligibility, a student must:</p> <ol style="list-style-type: none"> 1. Meet all credit, grade point average (GPA) and testing requirements for the standard diploma. 2. Have an IEP that documents the need for specialized instruction, transition or related services through age 21. <p>Upon deferment, the student must enroll in one of the educational programs listed below.</p> | |
| Program Type | Program Description |
| Accelerated College Credit Programs, as described in s.1007.27(1), F.S. Please note - These programs often have rigorous eligibility requirements, such as GPA. | Accelerated college credit programs, as described in s.1007.27(1), F.S., include dual enrollment and early admission, advanced placement, credit by examination, the International Baccalaureate (IB) program and the Advanced International Certificate of Education (AICE) program. Please note: Available courses and programs for dual enrollment will vary by school district. |
| Early College Programs | Dual Enrollment. Section, 1007.273, Florida Statutes. |
| Industry Certification Courses Leading to College Credit | Available courses and programs for industry certification will vary by school district and may have eligibility requirements. |
| Earn Scholar Designation | Enables students to continue working on requirements needed to earn a Scholar diploma designation. Please note – For a student to earn this designation the required statewide testing results cannot be waived. |
| Structured Work-Study, Internships or Pre-Apprenticeships | <p>Programs that prepare students for employment include a focus on the following skills that promote employability: self-determination and self-advocacy; social interaction; travel training; communication; and independent living. Please note, availability will vary by school district; and some programs have an application process, eligibility requirements and/or limited spaces, therefore acceptance may not be guaranteed and planning ahead is critical.</p> <p>Program examples:</p> <ul style="list-style-type: none"> - Project SEARCH - Community-based instruction (CBI) - Community-based vocational education (CBVE) - School-based enterprise (SBE) - Internships - Pre-apprenticeships |

Heading in a New Direction: Post-School Options

High school students who want to get more education or training after high school have many choices in Florida. There are also opportunities for students to find services to support postsecondary success. The Summary of Performance (SOP) is a document that must be provided to students with disabilities when they are leaving high school with a standard diploma or aging out of their educational program. The SOP describes the student in regard to the following: academic and functional performance; student preferences, interests, strengths and needs; accommodations, modifications and/or assistive technology used in high school; recommendations for accommodations; and assistive technology that may be needed in adult settings. Find more information about the SOP at <http://project10.info/DPage.php?ID=222>.

Additional documentation may be required and may vary from college to college. Many colleges require a recent evaluation. To make sure accommodations are in place before classes start, students should contact the disability services office at the technical center, college or university they plan to attend.

Disability Services at Colleges and Universities - The Individuals with Disabilities Education Act (IDEA), which requires public schools to create an IEP and provide services to students with disabilities, does not apply after a student graduates from high school. Adults, including college students, fall under the Americans with Disabilities Act and Section 504 of the Rehabilitation Act. Students with disabilities who plan to attend college must self-identify as a person with a disability and be prepared to take an active role in determining what accommodations are needed to help them be successful. Explore the differences between IDEA and ADA at <https://www.gtc.edu/sites/default/files/files/documents/DIFFERENCES%20BETWEEN%20HIGH%20SCHOOL%20AND%20COLLEGE%20DISABILITY%20SERVICES.pdf>

Career and Technical Colleges and Centers - Florida offers students 46 accredited career and technical centers throughout the state, which provide the education and certification necessary to work in a particular career or technical field. Programs are flexible for students and provide industry-specific education and training for a wide variety of occupations. Find more information in *Career and Technical Education: Enhancing Educational Experiences in Middle School, High School and Postsecondary Education* at http://project10.info/Documents/CTE_SSTIC_Product_with_CTE_Option_4.17.2020.pdf.

The Florida College System - The 28 state colleges offer career-related certificates and two-year associate degrees that prepare students to transfer to a bachelor's degree program or to enter jobs requiring specific skills. Florida College System institutions have an open door policy. This means that students, who have earned a standard high school diploma, have earned a high school equivalency diploma or have demonstrated success in postsecondary coursework, will be admitted to an associate degree program. Many also offer baccalaureate degrees in high-demand fields. The credits earned in an Associate's of Arts degree at a Florida College can also be transferred to a 4-year program at a Florida University. Find more information about the 2 + 2 System at http://www.fldoe.org/core/fileparse.php/5421/urlt/0078404-pathways_to_success.pdf.

Find more information about preparing your youth for postsecondary education in *Getting Ready for Educational Opportunities After High School: Families Supporting Students for Success* at http://project10.info/Documents/Final_PSE_Product_for_Posting_5.29.20.pdf.

State University System - There are 12 public universities in Florida that offer four-year bachelor-level degrees, as well as graduate and professional degrees. Admission into Florida's public universities is competitive. Prospective students should complete a rigorous curriculum in high school and apply to more than one university to increase their chance for acceptance. Find more information about how a first-time-in-college student can enter one of Florida's public universities here - <https://www.flbog.edu/universities/admissions-transfers/undergraduate-admissions/>.

Inclusive Postsecondary Education (IPSE), also known as, Transition and Postsecondary Programs for Students with Intellectual Disabilities (TPSID), are postsecondary programs that provide access for people with intellectual disabilities to study alongside non-disabled peers on a college campus. Students may take courses, practice social skills and learn employability skills. Inclusion with same-age peers, better access to employment opportunities and improving their independent living skills are among the benefits of these programs. Students who earn a standard diploma based on the access curriculum are eligible to apply. For more information, please visit the Inclusive Postsecondary Education webpage of the Project 10 website at <http://project10.info/DPage.php?ID=193>.

The Florida Center for Students with Unique Abilities (FCSUA) - The purpose of the center is to increase independent living, inclusive and experiential postsecondary education and employment opportunities for students with intellectual disabilities. Funding is available to help colleges set up new programs and also for student scholarships to attend these programs. There are several important distinctions between TPSID and FCSUA funding opportunities. FCSUA policies require the following:

- Students must have exited from the K-12 system to be eligible for FCSUA scholarships.
- Students may exceed the age of 22 and remain eligible for an FCSUA scholarship.
- Postsecondary programs must have Florida Postsecondary Comprehensive Transition Program (FPCTP) status or be in the application process to be eligible to receive grant funding.
- Postsecondary programs must be accessible to students who have exited the K-12 system. For more information, please visit www.FCSUA.org.

Keys to Success: Attitude, Self-Advocacy and Preparation - Postsecondary Education Guiding Questions

The following are some guiding questions and recommendations for families of youth with disabilities to help prepare them for postsecondary education (Office for Civil Rights, U.S. Department of Education, 2011).

1. Does your youth understand his/her disability?

Youth with disabilities need to know the nature of their disability as well as their strengths, interests and which accommodations have helped them be successful in learning. These skills can be learned while in school and practiced during the IEP process, so that youth are prepared to describe their disability and advocate for supports that will help them succeed in college.

2. Does your youth accept responsibility for his/her success?

Youth with disabilities who want to go to college will move from a school system where adults advocated for and directed their learning and accommodations to a postsecondary education system that requires them to advocate for themselves and be responsible for their own learning.

3. Is your youth taking an appropriate preparatory curriculum?

Students who plan to go to college when they graduate will need to complete a course of study that will adequately prepare them. It is important for youth to meet with their high school guidance counselor to make sure they are on the right course of study.

4. Has your youth learned time management skills?

Youth with disabilities typically receive a high amount of guidance and direction in high school. This level of monitoring and support will not be provided in the postsecondary setting. It is critical for youth with disabilities to develop time management skills while in school so they can be successful once they are on their own in college.

5. Does your youth have computer skills?

Computer skills help students with disabilities to be successful in college. Youth with disabilities can work with the college's disability services office, as well as computer lab and library staff, to coordinate technology tools that will help them use computers. Assistive technology can help students who have visual, hearing, physical or other disabilities to use computers.

6. Have you and your youth considered supplemental postsecondary education preparation programs?

Many colleges and universities have summer programs for students who are still in high school so they can experience campus life. Families can work with their youth's high school staff to identify preparation programs at their local college or university.

7. Have you guided your youth in researching postsecondary education programs?

It is important for youth with disabilities and their families to research colleges and universities and learn about available supports and services, as well as the process and requirements for arranging needed accommodations.

8. Have you and your youth considered getting involved on campus?

The first year of college can be very challenging, especially if your youth will be living far from home. New student or freshman orientations are a great place to begin learning about the campus, making friends, and deciding in which activities to participate.

Explore Agency Connections

As students get closer to graduation, students and families should connect or link with agencies. The following agencies and resources may be helpful in planning for life after high school:

Agency for Persons with Disabilities (APD)

APD helps support those who have developmental disabilities. APD may help with living, learning and working for those with developmental disabilities.

www.apd.myflorida.com

CareerSource Florida

Local CareerSource centers support businesses and help those looking for work. For more information, please visit CareerSource Florida's website at <https://careersourceflorida.com>.

Disability Rights Florida

Provides legal advocacy and rights protection for adults and children with a wide range of disabilities.

<https://disabilityrightsflorida.org/>

Division of Blind Services (DBS)

DBS uses a team approach to provide transition services. DBS brings the student, parents or family members, teachers, service providers and friends together to help young people who are blind or severely visually impaired. DBS helps to build skills to travel and live independently. DBS may also help with building skills to use assistive technology and read Braille. Learn more about DBS at <http://dbs.myflorida.com/Transition/index.html>.

Florida Association of Centers for Independent Living (CIL)

CILs support community living and independence for people with disabilities based on the belief that all people can live with dignity, make their own choices and participate fully in society.

<https://www.floridacils.org/home>

Florida Developmental Disabilities Council (FDDC)

FDDC helps plan individual and family-centered supports in Florida. FDDC plans and funds research and programs for persons with intellectual and developmental disabilities to improve their quality of life. FDDC developed a The Florida Postsecondary Education Guide. The guide shares information about college and university options for students with significant cognitive disabilities. The guide gives details on: programs, entry requirements, application details, housing options, work and volunteer opportunities, transportation and costs. The guide and other resources are available at

<https://www.fddc.org/publications>.

Florida Parent Centers

Family Network on Disabilities (FND) and their regional parent centers are federally funded providers of parent training and information (PTI) services. Help is provided to parents, teachers, community organizations and faith-based groups. These efforts help parents across Florida to increase their knowledge about how to help their youth to succeed in school and move on to post-school activities. Learn more about Florida PTI services and find a center near you at

<http://fndusa.org/>.

Additional Parent Centers include the following:

Empowerment Parent Resource Center

<https://www.eprcnwfl.com/>

Parent to Parent of Miami

<https://www.ptopmiami.org/>

Vocational Rehabilitation (VR)

VR is a key partner. VR helps support students with disabilities moving from school to employment. VR Transition Youth Services help students to prepare for, get and keep a job. VR can help students access career counseling, postsecondary education or training and work experience. Students with disabilities may apply to VR as early as age 14. Learn more about VR Transition Youth Services at
